**Information Disclosure Statement(s)**

1. No additional information disclosure statement listing of the type described at page 12 of the remarks is found. Nevertheless, since the Examiner agrees that "1992" is adequate (the absence of any date at all prompted the refusal to give evidence of consideration) the original submission of June 4, 2004 has been initialed with the year of publication added.
2. The impropriety in the wording of the information disclosure statement submitted July 9, 2004 is the absence of "first" and "any" in the statement. At the time of filing, the statement was not necessary for consideration.
3. The admonition "may not refer to the expected publication" regarding the information disclosure statement of September 11, 2003 ("submitted upon filing") means *you probably meant to list some other publication* (e.g., the publication resulting from application number 10/207,783, see page 6).

**Comment on Submission(s)**

4. The drawings were received on December 19, 2005. These drawings are acceptable.
5. Applicant's arguments, see pages 14-15, filed December 19, 2005, with respect to claims 6-10 have been fully considered and are persuasive. The rejection of claims 6-10 has been withdrawn.
6. ↓ The following is an examiner's statement of reasons for allowance: with respect to claims incorporating the language from now-canceled claim 1, the measurement of at least one constituent concentration on the basis of patient temperature does not appear to relate to mutual interference and its correction, accordingly, more than a noticeable difference is found.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
